SUMMARY

Frontend Developer with strong skills in HTML, CSS, JavaScript, and React, focused on building responsive, user-friendly web applications. Experienced in converting UI/UX designs into clean, functional interfaces and optimizing performance across devices. Passionate about modern web technologies, accessibility, and creating smooth user experiences through reusable components and clean code.

Education

Kakatiya Government College, Hanamkonda – India
BSc (Honours) Computer Science

Expected graduation date: May 2027
GPA: 7.2/10

Experience

UptoSkills

Jan 2026 – Present

Android Development Intern

MERN, Flutter, Android Studio

- Built and optimized Android application modules using Java and Android Studio to enhance application performance.
- Designed responsive UI components and improved user experience through efficient layout management.
- Integrated Firebase authentication and database services for secure and real-time data handling.
- Conducted debugging, testing, and performance optimization to ensure smooth app functionality.
- Engineered an advanced admin dashboard showcasing traffic and activity metrics of ambassadors and mentors using interactive charts and bar graphs; improved data visibility and decision-making efficiency by 40%.

AI-Resume Job finder – Project [Academic]

Dec 2025 – Jan 2026

AI-Resume Job Finder

MERN, React.js Tailwind

- Built and optimized Android application modules using Java and Android Studio to enhance application performance.
- Designed responsive UI components and improved user experience through efficient layout management.
- Integrated Firebase authentication and database services for secure and real-time data handling.
- Conducted debugging, testing, and performance optimization to ensure smooth app functionality.
- Engineered an advanced admin dashboard showcasing traffic and activity metrics of ambassadors and mentors using interactive charts and bar graphs; improved data visibility and decision-making efficiency by 40%.

Projects

Med Shakthi – Project (Flutter-based Healthcare Application)

Nov 2026

Flutter, Dart, Supabase, Google Maps API, Provider

- Developed **Med Shakthi**, a production-grade healthcare mobile application to manage medicines, orders, and patient data with real-time synchronization.
- Implemented **secure authentication** using Supabase Auth, ensuring safe login/signup and user data protection
- Built a **dynamic cart & checkout system** with real-time updates, currency localization (₹), and conditional shipping logic.
- Integrated **Google Maps API** for location services, enabling address selection with geocoding support.

Skills

Languages: Python, C, SQL, HTML, JavaScript, Typescript, Go, JAVA

Technologies & Tools: Linux/UNIX, regex, CI/CD, git, Firebase, Canva, APIs, Vercel, Render

Frameworks & Libraries: NextJS, Sanity, Node, React, Vue, Tailwind CSS, Chakra UI, Material UI SQLite, MongoDB, Redis, FastAPI
